Navajo Abandoned Uranium Mine

Site Screen Report

This form is for use at the site of abandoned uranium mines (AUM) located on Navajo Nation lands. Applicable sites include all mine and mine features that have or have not undergone reclamation by the Navajo Abandoned Mine Lands Reclamation Program, including features, adits, pits and waste piles. Applicable sites also include all AUM sites listed in the USEPA CERCLIS database, all sites listed in the 2008 AUM GIS Report issued by USACOE and USEPA, all AUM sites on allotment lands associated with the Navajo Nation, and any and all AUM sites not listed in any database located on Navajo lands. Reconnaissance of any sites located on lands adjacent to Navajo lands that may be impacting Navajo lands will need to be coordinated with the authorities appropriate to those lands.

The purpose of the form is to ascertain the status and location of the identified AUM site, and record all immediate site information associated with the mine site. Decisions and recommendations on what additional steps are needed will be provided on a separate document.

Billy Topaha Mine AUM Site

Navajo AUM Northern Region

Prepared by:

Weston Solutions, Inc.

Contract: W91238-06-F-0083

12767.063.496.1111

March 2010

Part I	Site Identification, Location and Status
Site Names a	nd ID numbers as applicable
Mine ID:	422
Map ID:	N258
CERCLIS:	NNN000908887
Navajo Aban	doned Mine Land Reclamation Program: None
Local name /	Aliases: Topaha
Chapter and	local area: Red Valley Chapter
County: Apa	ache State: Arizona
Lat/Long: 36	5.5005295341 N / -109.22530652 W
Nearby road	and highway: Indian Route 63 Local Post Office: Red Valley, AZ
Surface Land below	Status: check one or more and provide ownership and contact information
Tribal Trust Private Bureau of La State	Tribal Fee Land
Subsurface M	Ineral Rights:
No informatio	on on subsurface mineral rights ownership was found in the EPA/AUM Database.
Claim and op	perator information:
the operator of	surface land status is classified as Tribal Trust Land. Historical documents showed the mine as Climax Uranium from 1959 to 1960. No other historical ownership / cion was identified in the EPA/AUM database.
Number of re	esidential structures within 200 feet of mine:
None	
Estimated vo	lume of mine waste onsite:

Unknown

Part II Summary of radiological readings

Highest gamma radiation measurement:

16,886 counts per minute (cpm)

Describe any other radiological measurements:

Weston was unable to access the site. All known paths leading towards the site were impassible due to steep grades and heavy vegetation. Measurements were collected in the general vicinity of the site, approximately 400' south of the site boundary. A total of 2,497 gamma radiation measurements were collected near the mine site, ranging from 7,496 cpm to 16,886 cpm. The measurements are represented in Figures 1 and 2.

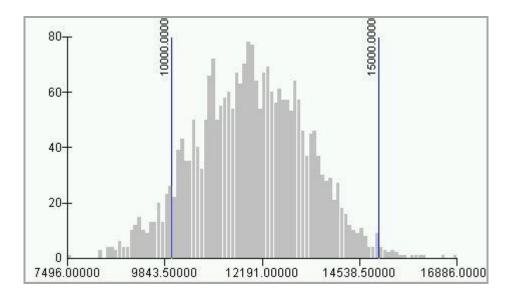

Background Locations

Average background = 10,624 cpm

#1 10,624 cpm

Distribution Chart and Statistics:

The following chart and statistics were generated by ESRI ArcGIS 9.3.1, and show the general distribution of the site gamma radiation measurements. The horizontal X axis represents the gamma radiation reading levels in cpm (lowest levels to the left). The vertical Y axis represents the frequency of each gamma radiation level.

 Count:
 2497

 Minimum:
 7496,00000

 Maximum:
 16886,00000

 Sum:
 29792778,00000

 Mean:
 11931,42891

 Median:
 11933,00000

 Standard Deviation:
 1332,35856

Part III Status of Reclamation and Mine Waste

The following information was obtained from the Navajo Abandoned Mine Land Reclamation Program (NAMLRP) Point Features Database:

NAMLRP Status of the mine site: Reclaimed: No Waste Pile onsite: Yes

NAMLRP Project Number: None

NAMLRP Mine features: 1 Portal

The following information was obtained from field observations collected during the 2009 site screening:

Provide description and status of all mine sites and features at site. Include all waste piles, adits, pits and other features, and indicate whether they are open, closed, covered, capped, buried or unreclaimed. Indicate approximate size, shape and extent, including description of any reclamation caps. Note condition of all caps.

Observed reclamation work and status:

Adits

Unknown

Waste Piles

Unknown

Pits

Unknown

Shafts

Unknown

Other Debris and Mine Features

The site was inaccessible, therefore no other mine features were observed during the site visit.

Part IV

Site observations and Environs

Observed Structures: list number of and describe human habitation status of structures at the following distances from mine:

0 to 200 feet: None

200 feet to 0.25 mile: None

Observed Public or commercial structure: list and describe all schools, clinics, Chapter Houses, places of business and any other structure used by members of the community at the following distances:

0 to 200 feet: None

200 feet to 0.25 mile: None

Levels measured around the perimeter(s) of the identified structure(s):

None

Observed water sources: list the number and type of wells and surface water sources that are potentially used for human consumption at the following distances from the mine:

0 to 0.25 miles: None

0.25 miles to 4 miles: None

Sensitive environments: note and describe all sensitive environments located within visible range of the mine site, including: wetlands, endangered species, habitats and approximate locations of sites that may be under protection of the government of the Navajo Nation.

None observed

Known Site History: include information from interviews with Chapter officials and residents. Note information on mine ownership, type of mining operation, period of operation, known amount of production, and any other information as provided.

Billy Topaha Mine consists of an area of 17,666.95 m². The mine was identified as being operational from 1959 to 1960. Historical documents showed the operator of the mine as Climax Uranium from 1959 to 1960. While operational, the mine had a total reported production volume of 703 tons. No other historical information or any additional ownership / lease information was identified in the EPA/AUM database.

Part V Response Action Summary

Site Name(s): Billy Topaha Mine **Chapter:** Cove

Decision Criteria

Is there an unreclaimed waste pile at the site? Unknown

At what distance from the waste pile is the nearest residential structure located? None

At what distances from the waste pile are there potential drinking water sources? None

Is there a reclamation cap or sealed adit in place at the site? Unknown

Is the cap/seal functionally intact? Unknown

Is the cap/seal sufficiently degraded to create a concern about releases? Unknown

At what distance from the cap/seal is the nearest domestic structure located? None

At what distance from the cap/seal is the nearest domestic drinking water source? None

Summary of emergency response factors

None

Summary hazard ranking system factors

None

Summary of reclamation factors

Unknown

Part VI Photos

Photo 1. Inaccessible steep grades towards site

Photo 2. Inaccessible steep grades towards site

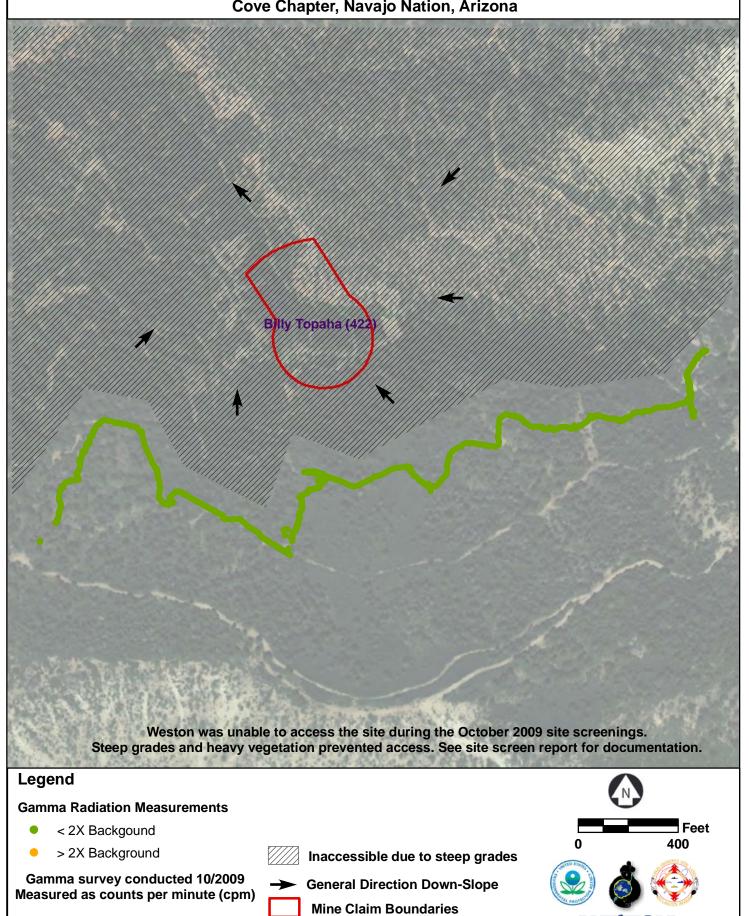

Photo 3. Impassible heavy vegetation towards site
